Project Summary

TATA | Data Visualization: Empowering Business Insights

- Processed sales data to track revenue and profit trends.
- Developed Tableau dashboards to display regional sales performance & customer behavior insights.
- Identified patterns that helped optimize inventory & pricing strategies.

Crop Production in India

- Used government data to analyze state-wise crop production and seasonal patterns.
- Developed a visual representation of agricultural trends using Tableau.
- Highlighted differences in crop yield efficiency across regions.

HR Attrition Dashboard

- Analyzed employee data to determine key factors affecting attrition rates.
- Built a Tableau dashboard to visualize factors affecting employee retention.
- Identified patterns in attrition based on experience, location, and performance data.

Capstone Project – Sales Performance Analysis

- Cleansed and prepared sales data using SQL queries for structured reporting.
- Built Tableau dashboards to compare revenue, total orders, and profit trends.
- Recommended process improvements that enhanced profitability by 12%.

Amazon Sales Dashboard

- Used Tableau to visualize sales trends, highlighting high-profit and low-revenue areas.
- Identified underperforming regions and product categories to target for improvement.
- Provided insights to enhance profitability and resource allocation strategies.
