Sales Operations | MIS Analyst

- Sales Operations professional with 5+ years of experience at Reliance Retail, with responsibilities spanning retail operations, MIS reporting, CRM coordination, inventory management, workforce planning, HR coordination, and recruitment support.
- Worked cross-functionally with store managers, cluster teams, Sales, CRM, HR, and operations teams to support store performance, staffing requirements, customer operations, and process improvement.
- Experienced in store- and cluster-level performance analysis, KPI tracking, inventory planning, reporting, data validation, and preparation of management-ready MIS reports.
- Hands-on professional experience with Advanced Excel, Power BI, Tableau, and Google Sheets for reporting, dashboards, performance analysis, and data visualization.
- MBA postgraduate with dual specialization in Human Resources and Marketing; foundational knowledge of SQL and Python gained through Data Analytics / Business Analytics training and personal projects.

WORK EXPERIENCE

Reliance Retail Ltd Sales Operations (Asst Sales Manager) • Full-time

02/2021 – Present
Hyderabad

- Supported Sales Operations and store performance requirements across Telangana, working with four clusters and approximately 50 stores, with primary day-to-day responsibility for two clusters.
- Extracted sales, store, and KPI data from internal analytics portals, consolidated multiple reports in Advanced Excel, and prepared cluster-wise MIS reports for management review.
- Compared store- and cluster-level performance parameters to identify strong areas, performance gaps, and underperforming stores; shared structured reports with cluster teams to support corrective actions.
- Used Advanced Excel, Power BI, and Tableau to prepare recurring dashboards and sales-performance reports; improved reporting efficiency and reduced manual reporting workload by approximately 30%.
- Managed inventory-control and demand-planning support by reviewing sales trends and stock requirements to improve product availability and minimize operational losses.
- Supported workforce planning and high-volume recruitment in coordination with HR, cluster teams, and store managers, including recruitment and onboarding support for 1,000+ frontline employees and manager-level requirements.
- Coordinated onboarding and staffing follow-up for store managers and other managerial positions based on cluster and store manpower requirements.
- Maintained accurate sales and customer information in CRM systems to support campaign tracking, customer outreach, and operational follow-up.
- Cleaned, organized, reconciled, and validated large sales and operational datasets before sharing reports with Sales Operations, store, and cluster teams.
- Worked as a cross-functional point of coordination between Sales Operations, MIS/reporting, CRM, HR, store managers, and cluster teams to support day-to-day business requirements.
